

COOLING AIR HARNESS

Air Harness provides critical cooling air for personnel in hot environments as well as breathing and/or purging air while wearing disposable suits.

AIR SUPPLY HOSES

The following Hose forms part of a suit system that provides protection to personnel working in radioactively contaminated environments typical of nuclear generating stations. Standard Air Supply products may be produced with performance criteria differing from these which feature:

- *Air Fittings: Hanson 2RL style*
- *Air Flow @ 75psig: 28scfm (13.2L/sec)*
- *Working Pressure: 115 psi*

Hoses in lengths up to 50' connect field workers wearing plastic suits such as those used in the CANDU Nuclear Reactor plants to wall mounted air headers.
