SPECIALIZED ENVIRONMENTAL SENSOR CASE

- Designed to protect and organize equipment in harsh environments
- Easy to deploy and monitor internal displays
- Rugged and durable case
- Customizable window size and position for easy viewing of displays for everyday use
- Multiple mounting options to fit in your desired space: magnetic, stanchion, handrail
- Exceptional value for extending lifespan of contained equipment
- Easy to open double latch mechanism to allow equipment adjustments
- Water-resistant and dustproof design enables use in wet and dirty environments

The Environmental Sensor Case is designed to include client specified components and equipment such as power supplies, test equipment, sensors, and wireless transmission interfaces.

The case can be mounted via 3 methods:

- on a vertical 1.6″ (dia.) stanchion
- on a guard rail
- by Dual Magnetic Quick Release Latch for mounting the case directly to a vertical steel surface such as a cabinet or an I-beam.
